FYRLYT and Air Tractor Europe Form Exclusive Distribution Alliance for Advanced Thermal Avionics in EUMENA Markets

ADELAIDE, Australia — 12 February 2026 — [FYRLYT PTY LTD](#) has partnered with [Air Tractor Europe](#) (ATE) as the exclusive distributor for its thermal avionics range across Europe, North Africa, and the Middle East. This strategic alliance integrates the EASA-certified [FYRFLY 640A thermal camera](#) into the Air Tractor platform, a critical infrastructure for aerial firefighting and agricultural operations.

Triple Crown Certification Validates Safety for Global Air Tractor Operators

The partnership follows FYRLYT's achievement of the "Triple Crown" certification—[EASA](#), [FAA](#), and [TCCA](#)—for the FYRFLY 640A. This rigorous regulatory validation ensures that operators in the EUMENA region have immediate, standardized access to thermal technology that meets the highest safety and engineering standards for demanding cockpits.

"To be chosen by Air Tractor Europe—the benchmark for operational excellence in their territory—is a powerful validation of the technology we've spent years perfecting," said [Paul Alisauskas](#), Managing Director of FYRLYT. "This isn't just about supplying hardware; it's about integrating a safety-critical capability into the backbone of Europe's firefighting and agricultural infrastructure".

Enhanced Visual Acuity for Aerial Firefighting and Agricultural Surveillance

Air Tractor Europe, based in Valencia, Spain, serves over 25 countries as the primary defense against Mediterranean wildfires. By integrating the FYRFLY 640A with [Garmin G600 TXi](#) glass cockpits, the system provides a quantum leap in situational awareness:

- **Precision Detection:** Identify hot spots through thick smoke and dust.
- **Low-Visibility Safety:** Enables safer operations at night or degraded visual conditions.
- **Agricultural Intelligence:** Detects thermal variances in crops and livestock to enhance monitoring. Feral animal control and anti poaching.

CONT'D

Design Ethos of First Principles for Rugged Aviation Environments

Unlike consumer-grade sensors, FYRLYT's avionics are engineered specifically for the vibrations and extreme temperature shifts of aviation. The [FYRFLY 640A](#) utilizes a "science-first" **design ethos of first principles**, featuring high-definition European sensors and Germanium lenses housed in durable monoblock aluminum with a hard anodised finish.

About FYRLYT

Based in Adelaide, South Australia, FYRLYT is an innovator in professional-grade thermal imaging and high-performance lighting. Engineered for real-world performance, FYRLYT products are utilized globally in aviation, surveillance, automotive and specialised industrial applications.

About Air Tractor Europe

Established in 1965, Air Tractor Europe is the exclusive distributor for [Air Tractor Inc.](#) in Europe, North Africa, and the Middle East. As a global leader in aerial firefighting and agriculture, the company provides integral services including sales, maintenance, and flight training.
