## THE GAME CHANGING FEATURE

Once you've used it you will never see thermal the same way again!  
 Image projected vividly onto windscreen in front of the driver.

### Benefits only a purpose designed system can deliver

The FTV 640 LRF1500, designed and made in Australia evolved from FYRLYT's ethos of FIRST PRINCIPLE DESIGN for purpose. Rather than cobbling together various products with inevitable compromises, we offer a ground up based system forged from years of real in field use by our design team.

### DSM wifi stability up to 5 tablets simultaneously

FYRLYT's unique Dynamic Stream Management delivers stable video streaming stability beyond any other system. Ideal for eco tourism and group operation scenarios. Each tablet can capture each user's own set of individual photos.
